ABSTRACT

Sinaga, Lili Sari. 2018. *Computer Science: The Use of Macromedia Flash 8.0 to Support Interactive Learning Media in English Subject*. Final Report. D-III English, Program University of Merdeka Malang. Advisor: Yasmin Farani, S.Pd., M.Pd.

Key Words: Computer, Animation Software, Macromedia Flash, Interactive Learning Media.

Learning media is a method used to simplify communication and shape interactions between teachers and students. The use of media will be a reference for teachers and students to improve learning systems that appear "theoretical". Something needed to support audio and visual at the same time is the main concern of the writer in taking the theme of this final report. The use of Macromedia Flash 8.0 to support interactive learning media in English Subject is a new form and idea in answering teacher's difficulties in directing students' attention, interests, and motivation in the English classroom. The use of animation software is expected to be one of the innovative and interesting ways in delivering learning material. The development of interactive based learning technology is also expected to work well so that it can become an evaluation of material in the future.

ACKNOWLEDGEMENT

First of all, I would like to express my deepest gratitude to Jesus Christ for overflowing of blessing and guidance so that this Final Report can be finished on time. As a Christian, I know that I cannot be successful without Jesus Christ blessing. I also would like to gratefully acknowledge the contributions of the following people whose considerable efforts, suggestions, ideas and insight helped me to make this Final Report more valuable.
