ABSTRACT

Maharani, K. 2017. Designing an Android-Based Application Tongue Twister for Adolescence Students. Final Report. D3 English Program, University of Merdeka Malang. Advisor: Yasmin Farani, S.Pd., M.Pd.

Key Words: Mobile devices, English, Pronunciation, Tongue twister.

This final report is intended to explain about Android-Based Application Tongue Twister. Android-Based Application Tongue Twister is the same as common tongue twister, this is just a new form of the way of learning tongue twister. To communicate globally, today's modern society uses the English Language as it sets as the international language. This also applies to the people of Indonesia. Many of them are good at English, but they have a problem with pronunciation. Pronunciation itself is one of important factors in communication using English. Therefore, pronunciation learning methods with tongue twister, which is considered effective, are used to help to improve learners pronunciation skills. Then, to make learning more effective, Android-Based Application Tongue Twister is built. This application which is designed by the writer is aimed to help users to practice their English especially in terms of speaking. It also has some useful features with special technology that will facilitate the users to improve their ability to speak English. It is a mobile learning application that can be installed on android devices. With its mobile nature, it can be used wherever and whenever so that its users have no restrictions when using this application.

ACKNOWLEDGEMENT

First of all, the writer wants to express her thanks to Allah SWT because of His bless this final report can be finished on time.

Next, I am grateful to my parents who always give me encouragement and support in my life and this final report as well.

A very special gratitude goes to Ms. Yasmin Farani, S.Pd., M.Pd. as my advisor for her support and patience in guiding me finishing this final report. With a special mention to Mr. Prilla L. Wediyantoro, S.Pd., M.Pd. for helping me in the beginning regarding final report as well. I also wish to thank all lecturers for passing their knowledge and sharing their experiences during my study.

And finally, last but no least, also to my friends in Faculty of Information Technology and D3 English Program for their support and encouragement along the way. Especially tomen and tomenwati, it was great to have you giving me advice and willingly trying and testing my application for this final report.
